Our everyday life offers many different situations, each requiring different types of light and functions. The STRALSUND ceiling light with integrated fan is a perfect example of how functionality and design can harmonise and meet various requirements in everyday life. The enclosed remote control allows you to control the fan as well as the light settings. The fan has three speed levels and, in addition to cooling in summer, also ensures ideal distribution of the heated air in the cold season. The light colour of the ceiling light can be adjusted in three steps or continuously from warm white to cool white. In addition, the luminaire has an RGB colour changer, integrated dimmer and a night light function, which can also be controlled via the remote control if required. The white Starlight cover and the silver-coloured elements turn the luminaire into an eye-catching living element that can be combined with many furnishing concepts. In addition, the luminaires feature modern LED technology, which stands for a high quality of light. LED light sources are characterized by a long service life and low heat generation.
